

## IMPORTANT NOTE FOR WEBINAR ATTENDEES

Omega Healthcare offers industry-specific webinars at no cost to the attendee. Each webinar is approved by AHIMA, AAPC or the NCRA and provides continuing education units (CEU). We list important points below which you should read if you elect to attend one of our free webinars. Omega Healthcare is not responsible should you not qualify to receive or did not receive your CEU certificate.

- You must attend at least 45 minutes of the webinar to earn the CEU(s). If you are attending an “On-Demand” session, you will also be required to pass the post assessment with 70%.
- You must enroll for each webinar and provide a valid email address so you receive an invitation to watch the webinar. Please be aware if you use your work email, it may be considered spam and prevent you from receiving the invitation mailer. We suggest you add to your contact list the email address [himeducation@omegahms.com](mailto:himeducation@omegahms.com). This will allow the email to go to your inbox instead of spam. You may want to check with your employer’s IT department.
- **The AHIMA/AAPC certificate will be available to you immediately following the webinar to download if you have attended at least 45 minutes of the webinar. PLEASE NOTE- WE WILL NO LONGER SEND CEU CERTIFICATES BY EMAIL AFTER THE WEBINAR SESSION. You will be responsible for downloading it during the live webinar\*only.** Click on certificate icon at the bottom task bar on On24 dashboard. Please disable the pop-up blocker on your laptop or desktop prior to downloading the AHIMA/AAPC/NCRA certificate.
- Please follow the steps below to download your CEU’s. In the panel below, there are two icons for AAPC and AHIMA CEUs. Find the highlighted icons.

When the **light turns green**, click on view certificate to view CEU and click on save to download.

There is an AHIMA and AAPC certificate, which can be downloaded after you have watched 45 minutes of webinar. Please download them separately.

- A follow-up email will be sent within 2 to 3 weeks post webinar, **with the final Q&A, Handouts, and the link to the recording only.** Remember to check your junk/spam folder for HIMEducation emails and mark as “Not Junk”.
- It is your responsibility to print and store the CEU certificate for future reference. You will need the certificate when it comes time to renew your certification. It is the responsibility of the attendee to ensure he or she has the documents required for maintaining his or her certification. Omega Healthcare will no longer track this information.
- Omega Healthcare will record the webinar and place the webinar on our website. You can either attend one of the live sessions or recorded “On-Demand” sessions to obtain your CEU certificate.

- While previously recorded webinars will still be available to view prior to the April 2022, CEU certificates are not provided. CEUs will only be available for recorded sessions beginning with the April 2022 webinars. You may view the webinars by clicking the link <https://www.omegahms.com/events-webinars/>. We are currently in the process of uploading previous webinars on our new website. Sorry for the inconvenience this may cause.
- You will not receive email notifications post the webinar.

Omega Healthcare is committed to the ongoing development of HIM professionals and the changes we made will help ensure we are able to continue providing webinars at no cost to attendees.

Omega Healthcare is considering offering premium access to participants willing to pay a nominal fee. Premium members would:

1. Get guaranteed access into the webinars (you don't have to worry about not accessing the webinar because we've reached maximum participation)
2. Get live customer support

Please answer the premium webinar question in the post webinar survey so that we can gauge your interest.

We thank you for your continued participation in our webinars.
